

INSULATION DONATIONS

For Local Farmers in Loughborough

SOCIAL VALUE IN ACTION

JAN 25

SOCIAL INITIATIVE:
Donations

LOCATION:
Loughborough

BACKGROUND

In connection with the works carried out at the National Rehabilitation Site in Loughborough, MAC recently donated excess insulation materials to local farmers situated close to the construction site. This donation was carried out in conjunction with CLEAR Engagement who exist to deliver real, sustainable, social and environmental change for people, communities and businesses.

In total MAC donated over £30,000 worth of insulated panels, and arrangements were made for the farmers to come and collect the materials which they will be using to build a new barn.

COMMUNITY FEEDBACK

The following is a letter of thanks received from one of the local farmers:

I send this letter to say thank you on two counts, firstly for allowing me to take the excess insulated cladding for future use when the need arises, and secondly for considering the environmental impacts associated with the construction project. In allowing me to receive your excess material, this has prevented items and equipment associated with the build ending up in landfill as well as reducing the carbon footprint associated with disposal - I am a local landowner living within 5 miles of the project so this means a lot to me.

Mr Andrew Harby
